44	Notes:																			
45	Domestically produced cars and lcvs total represents a proxy for aggregate local production.																			
46	Historical sales are based on data reported by NAAMSA member companies, vehicle manufacturers, importers and distributors.																			
47	Projections are based on NAAMSA analysis and demand assumptions and do not provide for supply side disruptions.																			
48	GDP growth rate represents GDP annual changes at market prices in real terms.																			
49	CBU Export figures are based on projects announced to date. Announcements of new CBU export programmes could change projections.																			
50	From 2012, imported vehicles which have subsequently been exported are reflected as "re-exported imports"
